PROFESSIONAL SUMMARY

Software Engineer focused on building modern, scalable web applications with React, Next.js, TypeScript, and Node.js. Experienced in data-heavy dashboards, interactive interfaces, REST API integrations, authentication, role-based systems, and full-stack applications. Strong focus on clean architecture, performance, reusable components, and intuitive user experiences.

PROFESSIONAL EXPERIENCE

Software Engineer — 1337

Khouribga, Morocco | 2024 - Present

- Developed full-stack web applications from requirements analysis through deployment using Next.js, TypeScript, NestJS, Express.js, PostgreSQL, and REST APIs.
- Built interactive dashboards, data visualization, aggregation workflows, validation systems, notifications, and admin interfaces for enterprise clients including OCP and HSE OCP.
- Solved frontend, backend, performance, and UX challenges across multiple production projects.

KEY PROJECTS

Confidential Analytics & Monitoring Platform

Professional Project

- Contributed to a production analytics platform for monitoring advertising and campaign data through interactive dashboards using Next.js, React, TypeScript, Tailwind CSS, and Zustand.
- Built data-heavy interfaces with advanced filters, date ranges, country filtering, collections, dynamic data fetching, and KPI visualizations.
- Optimized frontend performance by reducing unnecessary API requests, fixing duplicate data fetching, and improving state and filter management.
- Worked on shared state architecture in a monorepo and integrated APIs and authentication services including OAuth flows.
- Collaborated with backend engineers through Git/GitHub and CI/CD workflows to deliver and troubleshoot production features.

HSE SBU Manufacturing — 1337

Enterprise Project

- Built interactive KPI dashboards with aggregation by site and reporting period; implemented DTO/enum validation, admin workflows, notifications, and operational data interfaces.
- Performed intensive frontend calculations to reduce backend workload and improve responsiveness.

OCP Supply Chain — 1337

Enterprise Project

- Built production and inventory interfaces with drag-and-drop workflows for moving vessels between operational stages.
- Developed dashboards for production flows, inventory levels, operational status, alerts, reporting, and data aggregation; optimized frontend calculations for responsive UX.

AgencyOps — Multi-Tenant SaaS Dashboard

Personal Project

- Built a SaaS platform for employees, sales, P&L, sessions, performance, and real-time notifications with JWT authentication, RBAC, tenant isolation, and automated KPI calculations.
- Stack: Next.js, NestJS, TypeScript, PostgreSQL, Docker.

Ebazaar — Full-Stack Marketplace

Personal Project

- Built a Fiverr-inspired marketplace with customizable seller storefronts, order workflows, service delivery, and sales tracking.
- Stack: Next.js, NestJS, PostgreSQL, Tailwind CSS.

Communix — Full-Stack Collaboration Platform

Personal Project

- Built a responsive internal communication platform with posts, comments, voting, notifications, dashboards, and dynamic activity feeds.

EDUCATION

1337 — Software Engineering Program

Khouribga, Morocco | October 2023 - Present

- Intensive project-based program focused on C/C++, algorithms, web development, Unix systems, Git, cybersecurity, and full-stack engineering with emphasis on problem solving, autonomy, and teamwork.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Recharts | State: Zustand | Backend: Node.js, NestJS, Express.js, Fastify, REST APIs | Databases: PostgreSQL, SQLite, TypeORM, Prisma | DevOps: Git, GitHub, Docker, CI/CD | Auth: JWT, RBAC, OAuth | Architecture: Monorepos, REST APIs, reusable components, data-heavy apps | Design: Figma, Adobe Suite

LANGUAGES

Arabic — Native | French — Fluent | English — Professional Working Proficiency
